

Our Mission

Our mission is simply to provide our clients with the resources they need to maximize their profit potential. We don't just fix the issues; we help individuals understand what their true needs are. Enabling our clients to understand their true needs makes it possible for their businesses to thrive, therefore, they can pay more attention to the other aspects of their business and leave the technology to us, the experts.

Support you need to improve your business.*

NetView™ Monitoring System

Tel: 626.292.1643

Why Anmar Information Systems?

Anmar Information Systems has been in the Information Technology industry for over fifteen years. Our team of highly qualified Systems Engineers and Consultants are certified in the fields that are directly related to the computer networking industry. This means you can be assured that you are receiving the highest quality expertise from people who know what you really need. We will connect you with the resources you need to run your business as efficiently as possible.

We have a wide range of clients that entrust us with their technology assets, from law offices to clinics to everything in between. Our clients know that with Anmar Information Systems they are receiving the highest quality of service from a company that is fully knowledgeable in the field it represents: Technology.

What is NetView™?

The NetView™ Monitoring System is a unique system that takes snapshot photos of the activity performed on one or several computers. This allows companies to instantly monitor what their employees are doing on their company computers. NetView™ also allows you to monitor your employee's computers in "real time"; meaning that you not only get a snapshot photo of their computer activities, but you can also view what they do as they are doing it!

NetView™ can be made invisible to your employees so that only your authorized personnel know when monitoring is taking place.

We can completely customize your NetView™ Monitoring System to fit your needs and the needs of your business. From the amount of snapshot photos you would like your NetView™ Monitoring System to take per minute and per computer to being able to access your NetView™ Monitoring System remotely, from anywhere!

Why is NetView™ Important?

America Online and Salary.com conducted in-depth research relating to time wasted at work among 10,044 respondents during May and June, 2005. Populations surveyed included AOL users, Salary.com Salary Wizard users and corporate human resource professionals. Respondents were asked to indicate how much time they wasted in an average workday, assuming a work-week consisting of five 8-hour days.

What they found: The biggest distraction for respondents? Personal Internet use: 44.7% of more than 10,000 people polled cited web surfing as their #1 distraction at work.

Which industries account for the most wasted time?

Job Category	Time Wasted Per Day
1 Insurance	2.5 hrs.
2 Public Sector (Non Education)	2.4 hrs.
3 Research & Development	2.3 hrs.
4 Education	2.2 hrs.
5 Software & Internet	2.2 hrs.

Other Products and Services We Offer:

- Network Assessments - A FREE service to alert you of potential inefficiencies or problems (bottlenecks) within your current network; these inefficiencies may result in the loss of integrity of your important information.
- NetGuard™ - This systems allows us to guard your network from potentially malicious individuals, viruses, spam, and much more.

(continued)

- NetVault™ - A system that allows you to store a live backup image of all key company files and retrieve them over a network or from remote locations; this retrieval is possible through a secure and protected connection.
- NetConnect™ - Allows the connection of two separate networks and makes them appear as one; it also allows remote access for employees that work from home (telecommute). This system uses the highest level of security to protect your information.
- Firewalls - Custom built and designed to protect your network and data.
- Servers - Store your information and maintain it's integrity.
- Anti-Virus Servers - Protect your data from viruses.
- Desktop and Server Support - To ensure that your network runs at it's peak performance.
- Integration- We are able to integrate your current network to any new products you may need.

We have the capability to service network both small and large.
