

## Our Mission

---

Our mission is simply to provide our clients with the resources they need to maximize their profit potential. We don't just fix the issues; we help individuals understand what their true needs are. Enabling our clients to understand their true needs makes it possible for their businesses to thrive, therefore, they can pay more attention to the other aspects of their business and leave the technology to us, the experts.

## ***PROVIDING YOU WITH PEACE OF MIND.***

### **Why Choose Anmar Information Systems?**

Anmar Information Systems has been in the Information Technology industry for over fifteen years. Our team of highly qualified Systems Engineers and Consultants are certified in the fields that are directly related to the computer networking industry. Therefore, you can be assured that you are receiving the highest quality expertise from people who know what you really need. We will connect you with the resources you need to run your business as efficiently as possible.

We have a wide range of clients that entrust us with their technology assets, from law offices to clinics to everything in between. Our clients know that with Anmar Information Systems they are receiving the highest quality of service from a company that is fully knowledgeable in the field it represents: Technology.

**Let our Technology Experts  
handle your Network  
Security Issues**

### **Our Products and Services**

#### **NETWORK ASSESSMENTS**

**FREE** service to alert you of potential inefficiency or problems (bottlenecks) within your current network; these inefficiencies may result in the loss of integrity of your important information.

#### **SYSTEMS MAINTENANCE PLAN**

This Plan, not only covers all of your sensitive computer hardware components, which need to be working properly, but also the labor it takes to replace those vital computer parts. We also regularly clean and maintain your computer hardware to insure maximum productivity from your computer equipment.

#### **NETGUARD™**

Allows us to Guard your network from potentially malicious individuals, viruses, spam, and much more.

#### **INFRASTRUCTURE PROVISIONING AND DESIGN**

We build, design, and setup networks to fit the individual needs of your business.

#### **SECURITY CONSULTING**

To identify potential hazards in your network that may leave you vulnerable to attack.

#### **NETCONNECT™**

Allows the connection of two separate networks and makes them appear as one; it also allows remote access for employees who work from home. This system uses the highest level of security to protect your information.

#### **NETVAULT™**

Allows you to store a live backup image of all key company files and retrieve them over a network or from remote locations; this retrieval is possible

*(continued)*

through a secure and protected connection.

#### **NETVIEW™ MONITORING SYSTEM**

Allows key company personnel to view how their employees are using their company computer assets.

#### **NETWORK INTEGRATION**

We are capable of integrating your current network with any new products you may need.

#### **DESKTOP AND SERVER SUPPORT**

Maintain server and workstations at peak performance, allowing your business to get the most from your investment.

#### **SERVERS**

Store your information and maintain its integrity.

#### **ANTI-VIRUS SERVERS**

Custom built to protect your data from viruses.

#### **FIREWALLS**

Custom built and designed to protect your network and data.

#### **GENERAL IT CONSULTING**

From simple pc fixes to advanced design; with Anmar Information Systems, it is your opportunity to have a team of Computer Experts at your disposal.

***We have the capability of servicing networks, both small and large.***
